

Christmas Challenge

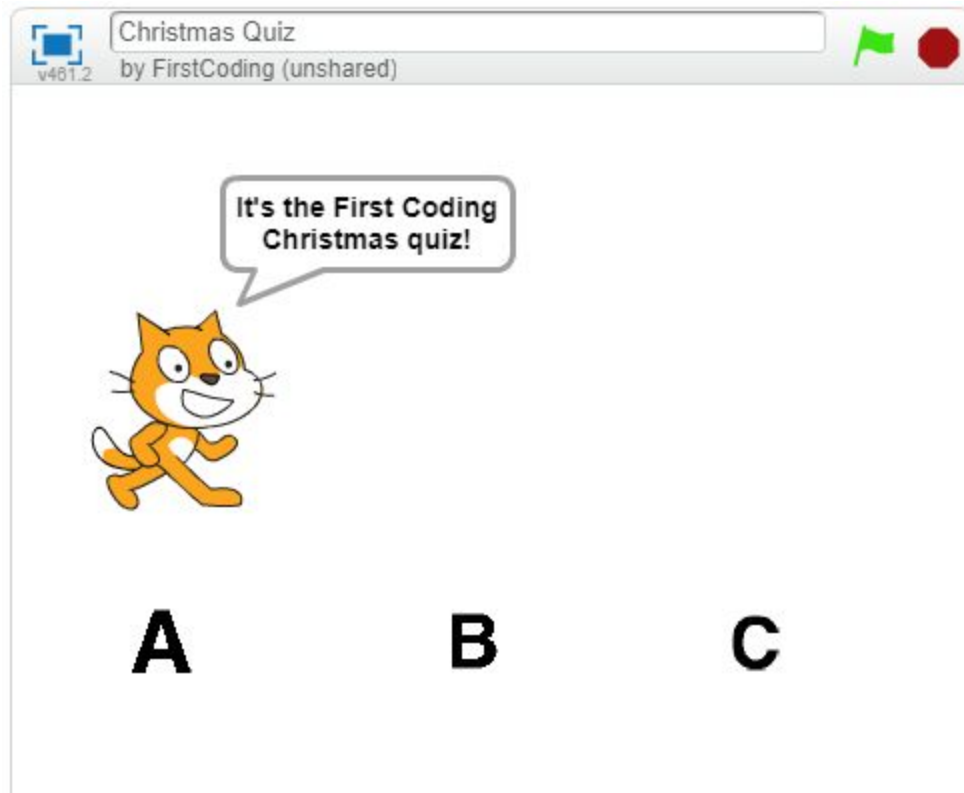

Your challenge this Christmas is to produce a Christmas quiz game whereby a character will ask three Christmas questions and the user has to choose A, B or C as their answer. An example could be:

What colour is Rudolph's nose?

A: Green

B: Red

C: Pink

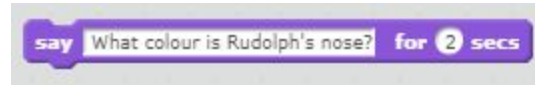

Two things to remember

- Extra points will be awarded to creativity.
- Always have a go but don't be afraid to ask for help.

Useful tips

You could use the **SAY** block in the **LOOKS** section to ask the question:

The A, B and C buttons will need to be separate sprites and when clicked on they will update a variable designed to store the user's answer. So the **WHEN THIS SPRITE IS CLICKED** block found in the **EVENTS** section will need to be used:

Depending on what button was pressed (A, B or C) the Answer variable will need to be updated:

An IF statement found in the **CONTROL** section can be used to work out whether the answer is correct or not:
