Dear Head,

Sharing an enthusiasm for coding is at the centre of everything we do here at First Coding. We're committed to demystifying the world of coding, and helping children understand that they can turn their ideas into reality in a few easy steps.

I set up First Coding in 2017 as a means to offer fun and creative coding workshops. With my background in technology, combined with my qualifications in art and design, I've got a history of creating projects that allow my imagination to come to life. First Coding offers a series of workshops suitable for years 5 through to 9, covering activities such as game design and 3d printing.

If your school would be interested in learning more about our after-school workshops, please don't hesitate to reach out to schedule a meeting. We'd love the opportunity to discuss how First Coding can support your educational goals.

Many thanks for your time and I look forward to hearing from you.

A handwritten signature in black ink that reads "Jez Whitworth". The signature is written in a cursive, flowing style.
